

# WIRE FEED TOOL

## FEATURES/ BENEFITS

Saves Time?	Work more efficiently
Saves Money?	Reduce labor costs
Safe to Use?	Prevent wear on hands
Reliable?	Use regularly

Our loom feed tool for split-flex tubing will help you work more efficiently, reduce labor costs, increase billable technician output, prevent wear & tear on your hands, and become a reliable cable management tool that you can use on a regular basis.

## INDUSTRY USES

- **Airlines** Virtually any technician or skilled laborer required to feed wire through split-flex tubing will benefit from using the Feed Master wire loom tool.
- **Automotive**
- **Audio & Video**
- **Telephone** Used for cable management and as a cable organizer, the cable feed tool can help in nearly all situations where wire, tubing or hoses needs to be fed through plastic split loom tubing.
- **Networking**
- **Manufacturing**

The safe & affordable tool everyone will want to have in their toolbox. The Feed Master loom tool was made to insert WIRES, CABLES & HOSES inside plastic split loom tubing, including Flexo F6, the new flexible, semi-rigid wrappable split braided tube from Techflex .

The Feed Master loom tool is perfect for technicians & skilled laborers who are required to feed wire in/ through split-flex tubing.

The Feed Master is also known as a fish tool or wire feed tool, but it doesn't matter what you call it the Feed Master gets the job done!
